Damien,
That sounds very exciting. Congratulations on the move!
Best,
Larry

Hi all,

Sorry for the blast email, but I just wanted to give you all a heads-up on my new role. I've taken a position as the Manager of the Conservation Data Centre for the British Columbia Ministry of Environment. The CDC (as it's known ... different kind of CDC!) does conservation assessments for plants, animals and ecosystems in BC, determining if they're threatened or endangered etc., as well as managing all the flora, fauna and ecosystem data for the Province. I'm very excited about the position, and about getting back to my conservation roots (with a healthy dose of data, of course).

Good luck in all your endeavours, and please keep in touch. If you're ever on the Island, please give me a shout (personal email is [REDACTED], mobile [REDACTED] and we can lift a pint.

Take care eh, and thanks for the friendship over the years!

Damien
